**DEAN OF UNIVERSITY FLAYS GEORGE HARVEY.**

Charlotte, N. C., May 30.—"Were Mr. George Harvey a hundred times ambassador to the court of St. James I still would say that he spoke with the tongue of Ananias and with the heart of Judas," declared Dr. Plato T. Durham, dean of Emory University, Atlanta, facing the graves of soldiers who died during the world war, in a memorial address here today.

"He seems to dispute with Benedict Arnold the evil eminence of treason, Dr. Durham continued, addressing, in the cemetery, an unusually large assemblage composed of veterans of the World War and of other wars and of civilians. Continuing his reference to the utterances of Ambassador Harvey at the Pilgrim's dinner in London, Dr. Durham exclaimed:

"His sentiments shall not coil like a poisonous serpent over the ashes of our devoted dead; he shall not lift the white crosses at their heads among the ignominious trophies of materialistic cynicism. All hail to you the living and to you who sleep! All hail to your great commander-in-chief, who raised the standard of American idealism against the earth's embattled selfishness, Woodrow Wilson!"

## Catarhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. Catarrhal Deafness requires constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed, the blood on the mucous surface of the middle ear is reduced, you hear imperfectly, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surface of the system, thus reducing the inflammation and restoring normal conditions. Circulars free. All Druggists. F. J. Cheney & Co., Toledo, Ohio.

## Nobody Loves a Weed

You will never know how good a cultivator can be built nor how easily a cultivator can be on horses and men until you use an International No. 4. We know of no cultivator that is so easily controlled in the crookedest rows. The weight of the cultivator and driver is carried on twenty polished steel balls in the axle pivots. Since the gangs always run parallel, the shovels are pushed edgewise through the soil. Pivot-ing the axles and shifting the gangs the both done with one movement of the foot pedal.
